Hog Ranchers Found Guilty Of Violations

Five north county hog ranchers were found guilty and fined $250 or 50 days in the county jail for violation of the county's hog ranch licensing ordinance by Justice of the Peace R. A. Rapsey at South San Francisco Wednesday.

Stay of execution on the sentences was granted for five days as Atty. Joseph J. Bullock, representing the ranchers, announced his intention to appeal Judge Rapsey's decision to the superior court.

By stipulation with Bullock and Dep. Dist. Atty. Fred Wyckoff, prosecution of some 35 other hog ranchers, also charged with violation of the licensing ordinance, will be delayed until the higher court passes on Bullock's projected appeal.

Fined were Emil Lombardi, Hugo Paoli, J. Lamori, Thomas Callan and A. Del Grande. Lombardi, who originally had pleaded guilty, entered demurrer through Bullock when his attempt to withdraw his plea was denied, and charged the county ordinance is "unreasonable, discriminatory and violates the 14th amendment to the United States Constitution." Bullock pointed out the ordinance provision exempting ranchers with 40 or less hogs from licensing, is discriminatory and violates the constitutional amendment, in his demurrer.

Wyckoff, for the county, presented photos and other evidence showing the hog ranchers allegedly violate county health provisions and have been operating without required licenses.

After Lombardi's appearance as initial defendant, Bullock and Wyckoff agreed by stipulation the same evidence for prosecution and defense would be presented in the other four individual's cases.

Abatement proceedings against hog ranchers in the county, have been forwarded by county supervisors to the county planning commission for study and action. Two abatement suits are now on file in superior court here, by the planning commission. The most recent suit names the Olcese ranch in Colma, as defendant.

The cymbal is the oldest known musical instrument made of brass, and was used as early as 1047 B.C.

Grant $10,000 For Probe Of Gambling

SAN JOSE — The board of Supervisors of Santa Clara County Monday granted an additional $10,000 to the special fund earmarked for Dist. Atty. Leonard R. Avilla's investigation of violation of the state gambling laws in connection with the grand jury indictment of Sheriff William J. Emig and four co-defendants.

The fund already amounted to $5000 but the board unanimously approved the additional sum, which does not have to be reported in an itemized account until the end of the fiscal year.

Joseph McKinnon, former chairman of the board, endorsed the resolution as "absolutely mandatory." Mr. Avilla indicated that the grand jury which was not in session would not be called back for several days.

Announcing that his clients will plead not guilty to the grand jury indictment when they appear in Superior Court Oct. 15, E. M. Rea said that he and the staff retained by the sheriff, Joe Regallo, Cyrus McMillan, Jack Paccheco and William K. Morgan, would push the case "clear to the U.S. Supreme Court if necessary."

"We may," said Rea, "make a general motion before Judge William F. James to supress all evidence," referring to the recordings on which were based part of the testimony that convinced the grand jury to indict. "If we are refused, our clients will plead not guilty and will have to take a chance on getting an honest jury," he added.

Bartender To Be Tried On Marihuana Charge

H. H. Stamper, bartender, goes on trial Nov. 6 before Superior Judge Aylett R. Cotton on charges of illegal possession of marihuana. The Brisbane resident was arrested and charged some weeks ago by state narcotics agents. Stamper pleaded not guilty before Judge Cotton Monday afternoon.

S.C. Chamber of Commerce Outlines Policies To Follow

SAN CARLOS—The San Carlos Chamber of Commerce held its first regular meeting since reorganization Monday night in the city hall council chambers with a small but energetic group present. Certain policies to follow over matters vitally affecting the city were outlined.

Pres. Newell Sharkey said one of the first moves of the chamber should be to aid the merchants who were being "hit every day" by one of the 67 organizations in town for contributions of prizes and cash orders. The business community is small, he said, and right now they are "wide open" for this kind of thing and there should be some clearing, perhaps, through the chamber of commerce.

Sharkey also emphasized that light industry should be encouraged to locate here to "take up the slack." Other members went further saying the industrial area across the Old County Rd. was standing idle because such places had been discouraged from coming into town.

It was moved to send a telegram to Governor Warren asking for him to intercede in the bus strike.

A finance committee was set up by the president who named William Klose, chairman, E. T. Okerlund and Dean McHan. It was agreed to set up a "booster committee" which would sit in on city council and planning commission meetings.

It was announced there were 51 paid up members with several hundred dollars in the treasury. Associate membership for non-merchants also was discussed.

Sharp Park Machinist Jailed for Battery

Walter O. Lawrence, 51, Sharp Park machinist, was arrested and held in the county jail on $500 cash bail on battery charges, filed Monday night by Henry Stephens, a neighbor, Sheriff James J. McGrath disclosed today. Stephen told arresting officers Lawrence had beaten him after they became involved in an argument after Lawrence had asked Stephens for the loan of an auto tool.

Sequoia Students Visit John Hayes

Sequoia High School drama students on two occasions last week visited with John Maxwell Hayes, actor who plays the role of Peter Tschaikowsky in "Song Without Words" which just completed an engagement at the Curran Theater in San Francisco, it was reported Tuesday.

Hayes visited Sequoia to see Mrs. Grace Leonard, his drama teacher at high school in Spokane. Enthusiastic students, members of the Sequoia Players and drama class, crowded the Little Theater to meet the noted actor. He talked with students for two hours, answering questions about Broadway and Hollywood and their stars and signing autograph books.

On Friday night, Mrs. Leonard and her students went to the theater where they were taken backstage and Hayes explained the technical side of the theater. Those attending were Russell Ladilaw, Stan Cottrell, Jack Weaver of the U.S. Navy, Malcolm Smith, Chester Villalba, Ann Bentley, Neva Prusch, Alice Anderson, Virginia Foulk, Pat Milberry, Sallie Carmack and Mrs. Leonard.

Hayes has also appeared in motion pictures. He was Father Romiam in "Song of Bernadette" and also acted in "Are These Our Children?", "Keys of the Kingdom," "Irish Eyes Are Smiling." He had the role of Beecher opposite Helen Hayes in "Harriet" prior to his present role.

Bavaria is the second largest state of Germany, with an area of some 30,000 square miles.

Committee Selects Juvenile Home Site

San Mateo's long-considered juvenile home moderinization moved a step nearer realization Wednesday as County Probation Chmn. E. H. Cosgriff of Burlingame announced approval of a resolution to Judge Aylett R. Cotton and supervisors asking construction of a new building on the site of the present "firetrap" home on lower Broadway, Redwood City.

"We're on the spot," Cosgriff said, announcing the committee's decision yesterday. "If anything happens to those kids in their present firetrap building, we'll get blamed. We approved suitable sites in various parts of the county and each one was met with objections by property owners nearby. It is an immediate necessity that something be done, so we have recommended construction of a new home on the present site."

Dr. Charles C. Gans, health department director, advised of the committee's action, said he still preferred his original choice, adjacent to the county relief home.

Belmont Woman Leaves $80,406.24 Estate

Appraisal of the estate of the late Mrs. Anna M. Coste, owner of Belmont's Casino, who died June 16, was filed by James A. Lee, appraiser, who estimated her estate as worth $80,416,24. Her will gives the property to her children. Property is described as cash, securities, and real property in both San Mateo and Santa Clara counties.

Window Box Brings Garden Beauty Close to Home

Many Victory gardeners live in hotels and apartments, and having learned the joy of growing plants in community gardens, are wondering how they can use their new skill nearer home.

For some the answer is a window box. Vegetables can hardly be grown in one, in any significant quantity, but a floral window box will bring close to home a bit of garden atmosphere, and will help make the city neighborhood brighter.

When you install an outdoor window box it immediately becomes a part of the house, and should conform to its architectural design and color scheme.

For this reason it is well to construct your own window box, and it is not difficult to do so.

The box itself should be of the same color as the building, or as its trim and the flowers should be of a contrasting color which is harmonious. For a red brick house, white flowers and plenty of green foliage would be attractive. For a house in which yellow is the prevailing tone blue flowers should be used. These are only suggestions, since the taste of the owner will control, of course.

The flowers must grow well, if the box is to give pleasure; and rich soil is most important, because there is so little of it. The soil should be what florists call good potting soil—a sandy loam well enriched.

To assure an adequate supply of food in the soil, a complete plant food should be mixed with the soil before it is placed in the pot at the rate of one heaping tablespoonful per gallon of soil.

The following table will be helpful:

4-inch pot requires	⅛ teaspoon
6-inch pot requires	1 teaspoon
8-inch pot requires	1½ teaspoons
10-inch pot requires	2 teaspoons

Porch boxes require plant food as follows:

Working Diagram of Attractive Window Box.

12 x 24 inches require	2½ tbsp.
12 x 36 inches require	4 tbsp.
15 x 48 inches require	6 tbsp.
24 x 60 inches require	13 tbsp.

Application should be made approximately every six weeks during the growing season.

This quantity refers to the highly soluble commercial plant foods of balanced content and does not apply to much slower acting organic materials.

The best window-box flowers are those which bear flowers freely and continuously. In these respects the petunia has no superior. All types are long bloomers, the large-flowered single and double, the small-flowered singles, the dwarfs and the balcony types. The fragrant double nasturtiums are fine window box material, and some of them are of the trailing habit.

It is possible to have a window box filled with morning glories, and it is hard to imagine a more beautiful decoration than their tapestry of green leaves and glorious blue flowers. They like a south exposure.

Young Bride of Navy Man Dies From Asphyxiation on Coastside

Death beat Jack Morris, 23, U. S. Navy fireman 3/c, home Tuesday, as his bride, Barbara, 22, was asphyxiated in their cabin court apartment at Brighton Beach while she was apparently dressing to greet him on his return from a tour of duty at Montara Naval Training Station.

Dep. Coroner Ida M. Lasswell of Daly City, who investigated the case said Mrs. Morris' death was accidental, apparently from asphyxiation due to natural gas. A gas heater was burning in the apartment when the girl's body was found, shortly before 5 p. m. yesterday, by Mrs. Alma Gittings, operator of the court apartments, Dep. Sheriff Harry Walters, Ocean Shore police district patrolman, reported.

The bride, who moved to the Coastside recently when her husband was transferred from the Midwest, had apparently begun dressing when she was overcome. Slumped on the bed, a shoe horn lay near her hand; her slippers were on the floor before her body.

Morris, who had been on duty since 8 a. m., was treated for shock when he arrived at the court to find his wife dead. The body was taken to W. C. Lasswell & Co. mortuary in Daly City after artificial respiration attempts were given up.

Today, Morris and his bride's parents, Mr. and Mrs. John Banks, met in the Daly City funeral parlor. The parents had flown here from Los Angeles, where they were visiting, upon hearing of their daughter's death last night.

Autopsy performed last night, Mrs. Lasswell said, indicated that death had been accidental, and due to fumes from the heater. Preliminary investigation indicated the heater's vent had been improperly constructed and freed an unusual amount of fumes in the room.

Two Mail Trucks, Three Autos Destroyed in $12,000 Fire

BURLINGAME—Two mail trucks and three automobiles were gutted by a roaring fire early Monday evening, that burned out the inside of a large brick garage in the heart of the Burlingame business district.

There was no mail in the trucks. Damage to the garage and vehicles was estimated at $12,000.

The spectacular flames which licked out the inside of the trucks and cars is believed to have started in one of the trucks quartered in the one-story building on City Hall Ln., 500 ft. east of Park Rd., and directly west of the rear of the Howard-Buick Service Garage.

The crackling blaze, which roared through the roof of the garage, attracted the attention of apartment residents on Burlingame Ave., who telephoned the alarm shortly after 8 o'clock.

Firemen had no chance of saving the vehicles, the fire having gained such headway before being discovered.

"RIVERSIDES didn't come on my car I CHOSE THEM!"

"You sure see plenty of Riverside Tires on our factory parking-lot!"

"I looked around, last year, when my first set of tires wore out. You'd be surprised how many of the gang on my shift rode back-and-forth to the plant on Riversides! *NOT* because Riversides happen to *come* on their cars, but because they deliberately *CHOSE* them . . . in preference to all other brands!"

Industrial workers are typical of the millions of car-owners who have switched to Riversides. All these folks, like yourself, want a tire that gives them most for their money; long wear on rugged roads; real protection against blow-outs. (Riversides today are 12% stronger than our pre-war tires!)

Capt. Robert E. Garcia Back After 3 Years Overseas

After three years overseas, Capt. Robert E. Garcia is home on terminal leave. Garcia, who was awarded the Silver Star for outstanding courage and leadership at Worseien, Germany, is the son of Mr. and Mrs. Robert P. Garcia of 124 Live Oak Ave., North Palo Alto.

The 1936 graduate of Sequoia High School holds the Purple Heart with Cluster, Presidential Unit Citation, Combat Infantryman's Badge, and European Theater Ribbon with four battle stars. He landed on the beach at Normandy on D-Day and when his company commander was killed, Garcia, then a first lieutenant, took over.

He was wounded in the arm after a week's fighting. Following hospitalization in England, he returned to his outfit and was given a battlefield promotion. Later at Worseien, the young officer assumed command when a platoon commander was seriously wounded. He reorganized and maneuvered the men across an open plain, his Silver Star citation reads.

During the battle, he was wounded when a German tank shot at short range, injuring him in the eye. Garcia, who attended San Jose State College for three years, entered the army in June, 1941, as a private. He attended officers' school at Ft. Benning, Ga., and received his promotoion to first lieutenant in June, 1943. Prior to entering the army, he was employed by the Palo Alto postoffice.

The officer's enegagement to Miss Eleanor Irwin of Redwood City, also a Sequoia graduate, was recently announced.

PUBLIC NOTICE

Statement of the Ownership, Management, Circulation, Etc., required by the Acts of Congress of August 24, 1912, and March 3, 1933.

Of Times-Gazette, published weekly at Redwood City, Calif., for October 1, 1945.

STATE OF CALIFORNIA } ss.
COUNTY OF SAN MATEO }

Before me, a notary public in and for the State and county aforesaid, personally appeared R. L. Spangler, who, having been duly sworn according to law, deposes and says that he is the business manager of the Times-Gazette and that the following is, to the best of his knowledge and belief, a true statement of the ownership, management, etc., of the aforesaid publication for the date shown in the above caption, required by the Act of August 24, 1912, as amended by the Act of March 3, 1933, embodied in section 537, Postal Laws and Regulations, printed on the reverse of this form, to wit:

1. That the names and addresses of the publisher, editor, managing editor, and business managers are:

Publisher D. E. O'Keefe, Menlo Park Calif.

Editor D. E. O'Keefe, Menlo Park, Calif.

Managing Editor: Otto O. Tallent, 176 Duane St., Redwood City, Calif.

Business Manager R. L. Spangler, Box 631, Redwood City, Calif.

2. That the owner is: (If owned by a corporation, its name and address must be stated and also immediately thereunder the names and addresses of stockholders owning or holding one per cent or more of total amount of stock. If not owned by a corporation, the names and addresses of the individual owners must be given. If owned by a firm, company, or other unincorporated concern, its name and address, as well as those of each individual member, must be given.)

D. E. O'Keefe, Menlo Park, Calif.

3. That the known bondholders, mortgagees, and other security holders owning or holding 1 per cent or more of total amount of bonds, mortgages, or other securities are: (If there are none, so state.) None.

4. That the two paragraphs next above giving the names of the owners, stockholders, and security holders, if any, contain not only the list of stockholders and security holders as they appear upon the books of the company but also, in cases where the stockholder or security holder appears upon the books of the company as trustee or in any other fiduciary relation, the name of the person or corporation for whom such trustee is acting, is given; also that the said two paragraphs contain statements embracing affiant's full knowledge and belief as to the circumstances and conditions under which stockholders and security holders who do not appear upon the books of the company as trustees, hold stock and securities in a capacity other than that of a bona fide owner; and this affiant has no reason to believe that any other person, association, or corporation has any interest direct or indirect in the said stock, bonds, or other securities than as so stated by him.

5. That the average number of copies of each issue of this publication sold or distributed, through the mails or otherwise, to paid subscribers during the twelve months preceding the date shown above is.....
(This information is required from daily publications only.)

R. L. Spangler

Sworn to and subscribed before me this 1st day of October, 1945.

Charge Mother With Child Taking

Child stealing charges against Mrs. Vera Mae Lowrey of Hanford were issued Monday by Chief Dep. Dist. Atty. A. S. Whitmore on complaint of her ex-husband, Garland Lowrey, state department of agriculture meat inspector living at Brisbane.

Lowrey charged Mrs. Lowrey, whom he divorced in Bentonville, Ark., in March, 1944, Sunday took their daughters, Jeanne Louise, 11, and Louise Belle, 8, from school at Brisbane and drove them to her present home in Hanford. Lowrey, who is re-married, was granted custody of the children when he was granted his divorce, he told Whitmore. Lowrey, who said his wife also had re-married, has lived in Brisbane for more than a year.

Jack Dunlap Fined For Building Violation

Jack Dunlap, Redwood City contractor, was fined $100 Friday night in Judge Roland King's court in Atherton on charges of building code violations, but sentence was suspended.

Dunlap, for whose arrest a warrant had been issued, was permitted to continue the remodeling job for R. C. Diebenkorn, 18 Bellew Ave., Atherton, which he had undertaken without a permit. Adjustments were made in the plans to bring the job into line with zoning regulations.

Home ownership in the United States increased 22 per cent between 1940 and 1944.

Sequoia To Be Host To Trustees

Sequoia High School will play host Oct. 27 to members of the San Mateo County Trustees Assn. and superintendents of schools throughout the county, Pansy J. Abbott, county superintendent of schools, announced Monday.

One trustee from every district and all superintendents will be invited to the annual meeting, Miss Abbott said.

Alfred Lentz, legal advisor to the State Department of Education and Asst. Dist. Atty. Daniel E. Sullivan will discuss "Legislation," with special reference to bills passed by the 1945 state legislature which should be brought to the attention of school trustees.

Election of officers for the trustees' association will be held following the luncheon and afternoon speakers. Frank Oehm of Millbrae, president of the association, will preside, Miss Abbott said.

A. J. Newman To Receive Discharge

Overseas since March, 1943, Sgt. Alfred J. Newman of Redwood City arrived at Camp Stoneman Tuesday and will proceed to Camp Beale for a discharge under the point system. He is expected home Friday.

Newman returned with his organization, the 43rd Infantry Division (Mountain Boys). They are the first group to be returned to this country after a brief period of occupation duty in Japan. Sergeant Newman joined the "Winged Victory" Division in July, 1943, at Guadalcanal.

The outfit has traveled the complete victory road from the Solomon Islands to New Guinea, to the Philippine Islands and finally to Japan. Newman was wounded in action early in 1944 and was hospitalized in Australia.

The 25-year-old infantryman was graduated from Sequoia High Sequoia in 1938 and was employed by Western Pipe & Steel Co. prior to entering the service nearly four years ago. He was a member of the Redwood City Community Players and the Masquers. The sergeant is the son of Mr. and Mrs. Dave Newman of 539 Iris St.

Judge Cotton To Set Aker's Trial Date

Brooks Akers, 45, 565 Burlingame Ave., Redwood City, will appear before Superior Judge Aylett R. Cotton Monday for trail date on assault with a deadly weapon charges. Akers, who pleaded not guilty yesterday, is charged with having stabbed his wife, Bonnie, 36, and Cpl. Ira M. Pitts, 36, Dibble Hospital patient, in an argument.

There are at least 250 different kinds of violets.

Delay Addition At Ravenswood

The Ravenswood District School Board Monday night extended the time for completion of the three new rooms at the Willow School until Nov. 1, at the request of Arthur D. Janssen, architect. Janssen explained that supply and labor delays have made it impossible to meet the original deadline of Sept. 20.

A 30-foot play area is being paved back of the school, the board was told.

Members went on record as endorsing the objectives of a meeting of parents and teachers called by Roy Liddicoat, district superintendent, to discuss the reading program at the school.

Among the business transactions reported were the purchase of a flagpole, completion of insurance arrangements for the new school bus, and continued investigation of the army surplus property sales with a vieiw to obtaining needed equipment.

Philip Perham, chairman of the committee on education of the Citizens' Service League, offered the league's support in educational projects for the community.

Liddicoat reported excellent progress of the recreation program being set up to provide after-school activities for children in the district.

Police Could Use Radar, Garcia Says

Elbert E. Garcia, Sequoia High School instructor formerly with the army air forces, declared at the Exchange Club meeting Tuesday that it would be practical to apply radar to city police problems. After describing the various radar devices used by the army and describing their capabilities, he said in his opinion San Francsco could set up a radar system which would give it an accurate radar screen picture of what was going on in all city streets 24 hours a day.

Garcia was introduced by Lt. Comdr. C. R. Baume.

Mrs. Don Gilmore Asks $1000 Alimony

An amended complaint, charging adultery, asking divorce, $1000 monthly alimony, and all the couple's community property, valued at $100,000, was filed in superior court here Tuesday by Mrs. Barbara Briggs McMaster Gilmore against Don Gilmore, San Francisco auto dealer.

The Hillsborough matron's amended complaint follows her filing of an original complaint charging cruelty last June. A month later Gilmore filed a cross-complaint, charging extreme cruelty to Mrs. Gilmore.

Gilmore, who operates auto salesrooms in San Francisco, Hayward and Riverside, was instructed to appear next Monday before Judge Aylett R. Cotton to answer questions concerning value of their community property.

'Beef' Tickets Sell Fast

More than half of the reservations available for the Chamber of Commerce Roast Beef Victory Dinner to be held Oct. 16 have already been set aside although reservations are not slated to close until Saturday, Mgr. E. W. (Ned) Butler said today.

The dinner, which will feature a 30-minute radio broadcast with Announcer Norvell Gillespie, will be held in Forester's Hall at 6:30 p.m.

Dr. Frank E. Cox, director of the business institute, bureau of business education of the State Department of Education, will discuss the business institute which will be held in Redwood City in January.

$20,097 Damages Asked in Suit

Suit for $20,097.50 damages, plus wages of $12 daily lost as a result of the accident, were filed in superior court here Monday by Peter Martell of San Mateo against Victor E. Montalvo, outgrowth of the recent accident in which Montalvo's auto injured seven persons waiting at a bus bench-stand along El Camino Real in San Mateo.

Martell asks damages on grounds his left arm, leg and side were seriously injured, preventing him from working since the accident last Sept. 30. He charges negligence on Montalvo's part.

Montalvo, at the time of the accident, declared he had struck the bench only because he swerved in an attempt to miss an oncoming auto.

County Killer Applies For Pardon Here

William Weaver, plumber, 909 Sixth Ave., San Bruno, has filed notice of intent to apply for certificate of rehabilitation and pardon in superior court here.

On parole since March, 1940, Weaver was convicted of second degree murder May 25, 1927 on charges he fatally wounded his estranged wife, Verna, shortly after she had applied for a divorce. An earlier petition, filed by Weaver

Nine species of pine are found Canada.

Colonel Murphy, Liberated From Jap Prison Camp, Meets Son in Manila; Now at M.P.

Back in 1940, Col. Dennis P. Murphy of Menlo Park, regimental commander of an engineering unit in the Philippines, bade his son, Robert W., good-bye as the boy left to return to the states and to Stanford University.

Two weeks ago, the colonel, liberated from a Jap prison camp in Mukden, Southern Manchuria, after three years as a Jap prisoner, was in Manila, awaiting transportation home, when a second lieutenant passed, apparently looking for someone. The boy looked familiar—and no wonder, for when he turned, Colonel Murphy found himself gazing at his own 24-year-old son, now Lieutenant Murphy. An engineering officer like his dad, young Murphy was on his way to duty in Japan.

That chance meeting was climax to a series of coincidences which befell the Menlo Park officer, now recovering at Dibble General Hospital, Menlo Park, during the long months he spent as a Nip prisoner until he was liberated by five Russians who parachuted into Mukden and met no opposition from the Japs.

A father grim note is struck by the colonel's disclosure that, out of the 11 Americans who were in his regiment, he is the only one left alive.

Then there was the harrowing experience of being locked for 19 days in the hold of a ship bound for Japan. With 363 other prisoners, Colonel Murphy was crowded into the ship which sailed from the Philippines. When the vessel docked, Allied planes began bombing, whereupon the Japs removed their own sick and wounded from the ship and locked in the helpless prisoners.

To ensure that the captives would not escape, the Nips jammed bales of hay and freight against the door. "We were in there for 19 days," the colonel said. "Fortunately, our ship wasn't hit, but the Japs taken off the ship were killed or wounded when their group was hit."

Unlike that of most liberated prisoners, Colonel Murphy's vision seems to be unaffected by the years of poor diet. Normally weighing 140 pounds, the colonel dropped to 115 once but is back to normal now.

One of his worst memories is that of the time he spent at Shirakawa, former Japanese training center so malaria-infested that Nipponese troops had been removed from the area. It was considered suitable for the prisoners, however, and they were moved in for a while. Captured American medical officers could treat the malaria victims, but only if the medically ignorant Jap corpsmen supervised, the colonel reveals. He himself has suffered five malaria attacks.

An infantry captain in the last war, 56-year-old Colonel Murphy has a record of 33 years' service in the army. His wife, Ethel, lives at 1009 Almanor, Menlo Park, where he is now spending a 60-day leave. Captured on Bataan, he hiked all the way in the infamous "Death March" and was imprisoned in the Philippines before going to Manchuria.

Plans Continue for Various Celebrations Of Sequoia High School's 50th Anniversary

Plans are spurting ahead for various celebrations of the 50th anniversary of Sequoia High School, Supt. A. C. Argo said Tuesday.

Thursday night, 10 civic leaders met with Argo and seven members of his faculty to map the program for the all-day conference at the high school which will give the community an opportunity to discuss and advise on the type of a curriculum Sequoia should offer.

The conference will be held in mid-November and the public is urged to attend and offer constructive suggestions, Argo said.

The steering committee includes John Eranosian, J. Elmer Morrish, Francis Britschgi, Mrs. John J. Garland, Ray Spangler, James T. O'Keefe Jr., Merritt Hosmer, Stuart W. Copps, Henry Hall and E. W. Butler. Faculty members are S. S. Mayo, Dr. James Thornton, Robert Poole, Donald L. Bogie, Miss Louise Watkins, Mrs. Marion Johnson and Miss Doris Dean.

Tentative plans for a pre-football game social hour with tinges of "homecoming" for alumni for the San Jose-Sequoia football game are being held in abeyance until officials determine if the contest can be played Saturday, Nov. 3, rather than Nov. 2, it was reported today.

A 50th anniversary assembly will be held Nov. 20 under the auspices of the speech and drama departments, directed by Mrs. Bernice Sterling and Mrs. Grace Leonard. Of the several ideas presented, one is the entrance of characters through a large anniversary book.

The executive committee which will direct the program includes Chester Villalba, Paul Gormley, Francis Lusk and Stan Cottrell. History of Sequoia material for the assembly will be gathered from the county courthouse by Margaret Holfines and Mary Sears; from the Sequoia library by Virginia Foulk and Malcolm Smith; from James Hedge, Gelsomina Smith; from Otis M. Carrington, Ted Stevens; from Mrs. Eyla Wooldridge, Stanley Cottrell and from the Sequoia Times, Joan van Epern.

Members of this year's publicity board at Sequoia are beginning a scrap book to include all stories mentioning the school during its anniversary year. Betty Patten, commissioner of publicity, reports that the book will be on display at the end of the year.

Other anniversary activities include an alumni banquet Dec. 15, for which Mrs. Florence Tiedemann and other members of the alumni association are making plans now, and decision on a useful and living World War II memorial before graduation next June. The committee in charge has recommended a recreation center on campus which will serve as a student center for all types of activities. Miss Anne Burns, librarian, heads the committee. An architect is soon to be contacted on the cost and suitability of the project.

San Mateo Motorist Faces Drunk Charge

Douglas W. Williams, 41, San Mateo motorist, was placed in the county jail Monday night by Belmont police after his arrest in Belmont on drunken driving charges. No accident was involved, Chief Fred Johnson declared. Williams was also charged with having no draft board identification card.

REDWOOD CITY PHONE RC 1300

Roy W. Cloud Speaks in S.F. To Bay Section Teachers

Roy W. Cloud of Redwood City, executive secretary of the California Teachers' Assn. since 1937, was the principal speaker of the Bay Section Council of the association Saturday when more than 150 educators gathered at the Sir Francis Drake Hotel in San Francisco for the annual fall meeting.

Cloud, county superintendnent of schools for some 18 years, presented the teachers and superintendents with a detailed report of the Strayer study schools, emphasizing the benefits which the children of California will receive through the operation of this new legislation.

Nine San Mateo County teachers and representatives of the school system here attended the all-day meeting. Among them were Miss Pansy J. Abbott, county superintendent of schools; Henry C. Hall, county director of child welfare and attendance; Miss Helen Hodgehead, teacher at Burlingame High School, and president of the San Mateo County Teachers' Assn.

Others attending from the county were Miss Bernice Showers, teacher at the Redwood City Central School and county representative of classroom teachers; Charles S. Morris, superintendent of the San Mateo Junior College; Warren Natwick, principal of the San Mateo Baywood School; David Ohlson, teacher at the Burlingame High School; Clive Saiz of Jefferson Union High School, and Robert Watson, instructor at San Mateo High School.

Pres. Wallace W. Hall of the Bay Section Teachers' Assn. and vice president of Marin Junior College, presided at the meeting. Members in attendance represented kindergarten, elementary, high school and junior college teachers, supervisors, and city and county superintendents of schools.

Committee reports indicated that schools would benefit by more attention to better working conditions in the classrooms for children a 24-hour school for childlren who need it, a continued opportunity for service men and others in adult education and junior college fields and a thorough study of the consolidation of one-teacher school districts and problems of a similar nature.

Jury Charges Emig With Chicken Grab

SAN JOSE—Charges made in an interim report of the Santa Clara County Grand Jury that "large quantities of chicken" were prepared in the jail kitchen for Sheriff William J. Emig's private restaurant, that prisoners were given unprecedented liberties, that conditions in the jail itself are "filthy" and that drug tablets are sold to the prisoners, were the highlights of the report, handed by Warren L. Holmes, foreman of the 1944 Grand Jury to Superior Judge William F. James Wednesday morning.

"Large quantities of chicken, several hundred at a time, were dressed and prepared in the jail kitchen for the sheriffs' own private restaurant," says the report. "Apparently the only benefit to the prisoners was that they got the gizzards and backbones."

The report concludes "we cannot find any justification for the special liberties given certain prisoners. This is a matter of law for which the sheriff should be held accountable." This refers to the liberties allowed a San Jose nudist who was allowed to leave county jail "almost at will and without escort to visit night spots."

Use your lemon reamer for squeezing onion juice.

Six Automobile Accidents on County Highways Over Weekend

Six accidents through San Mateo County were reported by California Highway Patrol officers for the weekend, three of them having occurred without injuries to any participants, Capt. E. F. Cassell said.

One motorist was arrested on drunk driving charges after a collision at Upland Rd. and Oak Knoll Dr., in which one passenger suffered minor injuries. Arrested was Harry D. Miller, 43, 5 Fairbanks Ave., San Carlos, on drunken driving charges. His car assertedly crashed into one driven by Emil Strehlow, 32, 926 Upland Rd., Redwood City, injuring Mrs. Susana Strehlow, 56, same address. She was treated at Community Hospital for superficial cuts and bruises.

A pedestrian, Miss Ramona Gabaldon, 37, San Pedro Ave., Colma, was given first aid treatment at South San Francisco hospital after she was knocked from her feet by the auto of Roy Scott, 48, Salinas, at Junipero Serra Blvd. and San Pedro Rd., Colma, Saturday afternoon.

In a collision at Ralston Rd. and Bayshore Hwy., Belmont, Sunday, Harriet Womac, 22, 540 Acacia Ave., San Bruno, suffered minor cuts when her car collided with one driven by C. C. Davis, San Francisco. Miss Womac, her sister, Marian, 23, and their mother, Mrs. Edna Womac,, were driving north when Davis' car struck their machine. Davis and his daughter, Diane, 7, were southbound.

The Tennessee Valley Authority was created by Congress in 1933.

Statistics show that 63 per cent of all falls in the home occur on stairs.

Herman F. Day Takes Part in Japan Occupation

Motor Machinist's Mate 1/c Herman F. Day participated in the seizure and occupation of the Japanese home island of Honshu and was present with the U. S. Naval Submarine Units in Tokyo Bay at the time of the Jap surrender, the navy announced today.

Day has been in the navy two and a half years and has served aboard the USS Proteus since January, 1944. His address is P.O. Box 46.

T. C. Clark Reports On Month's Recording

During September, 3450 papers, including 233 service discharges, were recorded by San Mateo County Recorder T. Clark Rice.

Fees collected during the month totaled $5111.90 to exceed the sum of $4445.05 colelcted during September, 1944, when 2792 papers were recorded, he said.

Marriages recorded totaled 106, deaths 102 and births 127, Rice stated.

Menlo Park Fire Dept. To Hold Demonstration

For observance of National Fire Prevention Week, Menlo Park Fire Department members will present a public demonstration at 8 o'clock at the firehouse Friday night, Chief Thomas F. Cuff announced Wednesday.

Rope jump tactics, pompier scaling ladder exercises, and methods of extinguishing oil fires will be shown, Cuff said, as well as evolution drills on the fire drill tower.

NORTHERN CALIFORNIA

Industrial Center of the New Pacific World

Gateway to a Billion New Customers . . .

This is a time to "speak up." It is a time to take action and get things done. Northern California was the established base of operations for the Pacific World during wartime. In the peacetime progress and prosperity to follow, this position can be maintained.

To present this story to the Nation, your gas and electric company, P. G. and E., has *now*, this month inaugurated a national advertising campaign for Northern California in the interests of industry, business, labor, agriculture, and population growth.

Watch for these advertisements in the national periodicals listed below. Read the forthright, factual messages they contain.

This series of national advertisements will reach a *monthly total of more than 5,450,000 readers.*

This is the first of a series of national advertisements to appear in:

SAFEWAY BAKING DAYS ARE HERE

Cool weather meals call for hot biscuits, rolls and muffins, baked at home and served warm and crisp . . . just as they come from the oven. That's why the Homemakers' Column right in this ad gives you some helpful baking tips. Naturally, sure baking success depends on top-quality ingredients, too. And that's exactly what you'll find at Safeway . . . priced to save you money!

How hot breads can enhance your meals

Hot muffins and rolls give that extra fillip to the meals you'll be serving these Fall days when there's just a hint of frost in the air. While dinner is in the making make full use of your oven heat by baking some of the old favorites listed below.

Hamburger Muffins make a main dish in themselves. Brown ¾ to 1 pound hamburger in frying pan, sprinkling lightly with poultry seasoning, salt and pepper. Add to your favorite muffin batter.

Spoon into greased muffin pans, filling ⅔ full. Bake in moderately hot oven, (425° F) 25 minutes or until done. Make gravy with meat drippings, and serve over muffins. Serves 6.

Surprise Muffins are a treat for a special breakfast. Break them open for the surprise inside. Spoon muffin batter into well greased muffin pans; place ½ teaspoon jam or jelly on top. Bake in a moderately hot oven (425° F) 20 minutes. Makes 12 muffins.

Tomato Biscuits give flavor and color to old standbys. Simply use tomato juice instead of milk in a standard baking powder biscuit recipe. A few caraway seeds sprinkled on top of the biscuits add flavor interest too.

Cheese Drop Biscuits are quick and easy. Add ½ cup grated cheese to dry ingredients in baking powder biscuit recipe and then increase the milk so that the dough is quite soft. Drop by spoonfuls on baking sheet. Bake in a hot oven (450° F) 12 to 15 minutes. These biscuits also make a good topping for a meat or chicken pie. Drop on hot filling in casserole and bake as above.

Supper Rolls—Place ¼ cup shortening; 1 teaspoon salt and 2 tablespoons sugar into large bowl and add 1¼ cups lukewarm water; stir well. Stir in one beaten egg and one cake fresh yeast crumbled. Add 3½ cups sifted all-purpose flour all at once and beat with fork to make a soft dough. Spoon batter into well-greased muffin pans, filling half full. Cover with a damp cloth and let rise about 1 hour, or until light. Bake in moderately hot oven (425° F) 20 minutes or until lightly browned. Makes 18 rolls.

A Lecture on Christian Science by Leonard T. Carney, C. S. B.

Mr. Carney was introduced by Mrs. Margaret Coykendall, Second Reader of First Church of Christ, Scientist, Redwood City, who said, a Christian Science lecture is a welcome event to all Christian Scientists. Because we have found in this study a way of life and a healing power we are glad of every opportunity to learn more of this inexhaustible Science. To those who are investigating we are happy to present one well qualified to speak on this subject, a member of the Board of Lectureship of the Mother Church, The First Church of Christ, Scientist, in Boston, Massachusetts. The subject is, "Christian Science: Utilizing Divine Power," Mr. Leonard T. Carney of Beverly Hills, California.

Christian Science

Entitled

Christian Science: Utilizing Divine Power

by

of Beverly Hills, California Leonard T. Carney, C. S. B.

Member of the Board of Lectureship of The Mother Church, The First Church of Christ, Scientist, in Boston, Massachusetts

The lecturer spoke substantially as follows:

Deep in the heart of troubled humanity, we may hear the cry of an urgent need swelling into a mighty crescendo. It is this: "I want deliverance from danger, freedom from fear, liberation from lack, surcease from sickness; I want peace and happiness. All this I must have for myself and my loved ones." If in the midst of great need one were told that there is an invisible power, which has been tried and tested for thousands of years and never found wanting, and that this power is of God, would it not be considered strange if one should turn away and say, "It interests me not all!"

The Discoverer and the Messenger

Great discoverers throughout history have braved the scorn and scoffing of the incredulous, the anathemas of the bigoted. Galileo, Fulton, Bell endured the ridicule, even the hostility, of lesser minds. It was not the lot of Mary Baker Eddy, the Discoverer and Founder of Chrstian Science, to escape the refining fires of true greatness. She was a gently bred New England woman of distinguished ancestry, culture, and learning. When she was a child, it was said of her by her learned Congregational pastor and tutor: "Bright, good, and pure, aye brilliant! I never before had a pupil with such depth and independence of thought. She has some great future, mark that. She is an intellectual and spiritual genius" (The Life of Mary Baker Eddy by Sibyl Wilbur, p. 33).

Throughout her lifetime Mrs. Eddy was one of the most consistent followers of Bible teachings that the world has ever known. In the light of her spiritual understanding, gained through revelation and the study of the Bible alone, she was able to heal others of sin and disease as well as to raise some from their deathbeds. Down through the centuries everyone has been free to follow Jesus' command to "heal the sick, cleanse the lepers, raise the dead, cast out devils." But Mrs. Eddy not only heard this word of command, but obeyed. Thus she became the divinely appointed messenger of God, a messenger with a message, bringing to us the understanding of the Comforter, or Christian Science, the coming of which Christ Jesus prophesied in these words: "The Comforter . . . shall teach you all things, and bring all things to your remembrance, whatsoever I have said unto you."

No Personal Deification

For Christian Scientists to express gratitude to their Leader for benefits received through her teachings is not deifying her. If your purse were lost, the finder doubtless would be the recipient of your heartfelt thanks. If your life were doomed, the one who showed you how to recover it should likewise receive your profound gratitude. The manufacturer of a nationally known article once complained that Christian Scientists deified their Leader because her name is identified with the various activities of the movement. He was asked, "Why do you have your initial impressed on each item which you manufacture and sell?" He replied, "So the public cannot be deceived." Then said the inquirer, "For the same reason Christian Scientists identify the name of their Leader with her books, her organization, and followers, so that the public cannot be deceived by the many counterfeits."

The Bible and the Textbook

The Bible of our forefathers is the basis of all spiritual healing. That revered and age-old volume of spiritual lore, replete with a nation's history, laws, biographies, letters, poetry, songs, and sermons, is woven through and through with the golden thread of spiritual revelation and the silver filament of divine mercy and love. Christian Scientists inevitably become daily students of the Bible. It is essential to their faith and works. To them the Bible is no longer remote but near at hand, no longer a fetish but a friend, no longer a fearsome volume of reproach but a tender counselor and guide. It is indeed the book not of yesterday but the Bible for today—and for all time.

Because of a lifelong devotion to the Bible, the Founder of Christian Science dedicated her skillful pen to elucidating its sacred meanings. Mrs. Eddy's unique volume, "Science and Health with Key to the Scriptures," commonly called the textbook of Christian Science, though reasonable in price, is immeasurable in value. An understanding of its pages has healed countless numbers from lifelong suffering, preserved the dying, purified the sinful, supplied the poor, rebuilt character, restored peace and happiness. The textbook is the responsive friend to multitudes. To own and study this book is to possess the "pearl of great price."

The Availability of Divine Power

In a world in which impoverishment, instability, and warfare are increasing rather than diminishing the problems confronting mankind, is it singular that the individual should once again long for a Messiah or Christ-power to silence his fears, heal his troubles, and assure his weary hope?

Many have experienced benefits of an unusual nature which they have attributed to luck or chance, sometimes to miracles. Comparatively few have looked beneath the surface for a law of causation, a source of good. One well-known public man who has been brought safely through more peril, perhaps, than any other individual, has said that he is convinced there is a divine power which controls and governs in times of danger, delivering men from jeopardy.

We read in the Christian Science textbook (p. 134), "There is divine authority for believing in the superiority of spiritual power over material resistance." When faced with sudden danger, many years ago, I proved this law for myself beyond cavil. I was driving a heavily loaded automobile over a steep mountain range in the Northwest. Part way up the mountain we encountered snow, rendering traction on the narrow unpaved roadway insecure. Within sight of the crest and on a long sweeping curve where the roadbed sloped faultily towards the outer edge, an automobile had slipped so that one rear wheel hung over the precipice. Only by skillful handling was it pulled out of the deep snow to safety by a crew of men operating a mountain truck. I started my car, increasing its speed, but upon reaching the dangerous point the car ceased its forward momentum and slipped backward and outward to the edge of the precipice in the tracks of the other car, the wheels without chains churning helplessly in the snow. I then made firm and audible declarations of truth, that God is ever present, that His law is all-governing, that divine power is all-controlling, for "underneath are the everlasting arms." With my deep and instant realization of these truths, the tread of the tires, although snow-packed, ceased slipping as though in sudden response to a command. With every declaration of truth they took firm grip on the roadway, and the car was brought back from peril into safety, thus illustrating our Leader's statement (Science and Health, p. 427), "Immortal Mind, governing all, must be acknowledged as supreme in the physical realm, so-called, as well as in the spiritual." Farther up the grade a similar hazard was faced, and again divine power proved sufficient for the need. Finally the summit was reached in safety. The exultant sense of gratitude and joy in having just winessed such an immediate manifestation of God's power cannot adequately be described. This and other recurring proofs served to solidify a mounting conviction that the Bible teaching, "God is our refuge and strength, a very present help in trouble," is based on an invariable law of divine power applicable in times of need. Many fliers and others in the present war have acknowledged their deliverance through prayer from situations far more perilous.

The Nature and Understanding of This Power

It is not possible within the limits of this hour to answer the question, "What is this power and how does it heal?" Only a devoted study of the textbook can fully answer that question. However in presenting some phases it may be remarked at the outset that the healing power is not that of one human mind over another; it is not will power, hypnotism, faith cure, and the like. It is the same deific power of the eternal Christ which activated the healings of Jesus and the apostles two thousand years ago.

To understand this power one must understand God. This requires humbleness of mind, the spirit of the beatitude, "Blessed are the meek: for they shall inherit the earth." Humility is strength, not weakness. It is the sturdy oak bearing the brunt of the storm; the strong piers of the mighty bridge spanning the torrent. Humility is the solid foundation of real success and true greatness. It is not self-depreciation, but a rightful sense of self-appreciation, a just estimate of one's real self as the child of God. One perched high on the pinnacle of self-adulation cannot move forward, nor can he make progress mired in the clay of self-condemnation. He who would reach the goal must travel the straight road of humility.

Words may seek to define God but only spiritual thought may rightly apprehend Him. Thought must ascend beyond earthly things to catch even a faint gleam of God. Experts spend years in arduous labor polishing the largest lens, then mounting it far from habitation and artificial illumination, so that it may bring to view the unknown constellations of the stars. With the same intent, steadfast gaze away from earthly things one may look through the lens of Spirit and perceive the nature and character of God, the all-wise, all-loving, and eternal, infinite Mind, Spirit, Life, Truth, Love, which are all Biblical terms used to define the nature of God. God includes all that really exists. He is all-inclusive, all-embracing, all-encircling, all-encompassing. God is All-in-all.

Its Utilization and Treatment

Such is the starting point, the beginning of Christian Science treatment. The nature of treatment is that of prayer. It is not beseeching God for earthly things, but is the recognition of spiritual things. This prayer, or treatment, acts upon the human mind, and this in turn governs the body. Prayer is entering the divine presence, having audience or communion with God, approaching Him in humble adoration and worship. Just as one beholds with rapture the exquisite blooms of rare beauty adorning garden and landscape, so one may with joy view the Spiritual ideas of God, man and the universe, perfect reflections of their creator, the glorified offspring of ineffable Love. This uplifted state of consciousness is attained either by spiritual inspiration or by right reasoning and argument. This is denying the beliefs of the material senses, such as fear, sin, sickness, symptoms, suffering, and death, and affirming the truths of spiritual sense.

In treatment one must hold thought steadfastly to God. The ship's compass, its needle pointing to the pole through the mountainous waves of storm and stress, is indicative of that steadfast clinging to God and His ideas which brings healing to the sick and sinning. We must adhere to the truth of being, cling to Mind's ideas, cleave to spiritual facts, stick to the realization that it is the divine idea which empowers us. To quote again from Science and Health (p. 261), "Hold thought steadfastly to the enduring, the good, and the true, and you will bring these into your experience proportionably to their occupancy of your thoughts."

A Christian Scientist once found himself clinging by his hands to the almost perpendicular rock wall of a cliff, his toes on a ledge below, the uncertain pathway downward having disappeared. His small son was between him and the wall, his feet on those of his father. No further step downward was visible, no retreat upward possible. Great fear began to weaken the father's hold, when the little boy with assurance said: "Daddy, God is right here. You don't need to be afraid." Then the father began to cling steadfastly to God, holding firmly to the truth that, as the child said, "God is right here." His hold on the ledge became firmer, his eye clearer, until a possible downward step, and then another and another appeared. Finally safety was reached fifty feet below. By holding thought steadfastly to God, fear was dispelled and the human footsteps were brought to light.

The Christ-Power

What is the point of contact between God and our daily needs? To light a city requires not only the powerhouse but the means of transmission as well. The old prophets looked for the manifestation of God's power which would bring healing to the world. Isaiah referred to it as "light": "The people that walked in darkness have seen a great light: . . . upon them hath the light shined." This light of understanding, this manifestation of divine power, came to be known in the following centuries as the Messiah or Christ, the spiritual idea of God, which Jesus demonstrated so effectively.

To be worthy and valuable, our understanding of the Christ must do something, accomplish something, for the distinctive mission of the Christ is to heal us physically, financially, morally. If you understand God to be omnipotent, omniscient, omnipresent, invincible and irresistible Truth, then the Christ has come to you and it will heal. It silences fear, destroys pain, and restores normal action to the body. It removes whatever is erroneous and supplies that which balances and happifies existence. The Christ-idea is also the communicator of truth from God to man, instructing man in things divine. It comforts the sorrowing, satisfies the lonely, brings happiness and joy to earth. You will recognize it by the quietness and peace that comes to you.

The following incident illustrates the fact tha neither severity of the disease nor distance of the practitioner from the patient lessens the effectiveness of the Christ-power to act upon the human mind and thereby govern and heal the body. It occurred in a family early in their experience in Christian Science. One member near and dear to them became afflicted with diphtheria in a most virulent form. The symptoms were clearely apparent and alarming indeed. The Christian Science practitioner who applied the rule of healing was twenty-five hundred miles away. Despite the anxious fears of the family, they clung tenaciously to the spiritual facts of Life, as opposed to the fearsome testimony before them. For several days the disease raged, and then the symptoms subsided and the healing came. The Christ-power had opened the prison door of suffering and let the oppressed go free. This became an infallible proof to all concerned that clinging steadfastly to the spiritual idea of God heals the sick; that this may be done effectively even though the practitioner be far away, even as did Jesus when he healed the centurion's servant who was absent from him.

In order that the Christ may come to us, abide with us, and be available for our every need, we must be receptive to it. A closed door bars a welcome guest. The ever-present Christ will come to our understanding only as we are pure, patient, loving, and meek. It is elusive to the hard of heart; it enters at the door of those who are God-related, tender, and trusting. Selfishness, self-satisfaction, self-will, and sin close the door of receptivity; while humility, honesty, purity, faith, and understanding open it wide to the Christly visitant and it abides with us. If healing is delayed, it would be well to discover what bars our mental door against that which comes to bless and heal everyone, everywhere, every moment.

Disease a Product of the Human Mind

DISEASE A PRODUCT gehbi,

It may surprise some of us to learn that sickness is as much a product of the human mind as is sin. In an Associated Press news story of May 29, 1943, we read the following: "Discovery of a poisonous substance which appears suddenly in the human blood during fear and anxiety was reported to the New York Academy of Medicine May 27, 1943. . . . The strange human worry substance mounted in proportion to the rise of fear, worry, or other emotional upset. . . . The physical changes are frequent and varied. They often result in physical diseases whose only cause appears to be a state of mind."

This is not news to Christian Scientists. For over three quarters of a century the Founder of Christian Science has been telling the world through her writings that the human mind induces organic as well as functional diseases, and that the healing of sickness, like that of sin, must come through a change in the human mind. If it is true that the cause of disease is a state of mind, as the news item indicates, then the one who believes that his difficulty is a state of matter is laboring under an illusion, or mesmerism, which must be removed before he can be healed completely.

The Mesmeric Nature of Disease, Fear and Lack

The following is illustrative of the deceptive and mesmeric nature of matter, causing something to appear to exist when it does not. It is related that some years ago a European professor, not a Christian Scientist, desired to investigate the mental powers of a celebrated magician who performed his feats in a large cave far up in the mountains of India. Previous to that time no one had been able to undergo the terrifying experiences, so real did they seem to be. Prior to the test, the professor walked through the cave to assure himself that it was free from device or trickery. He found nothing unusual. He firmly resolved that notwithstanding what he would see or experience during the test he should know that it had no place in a normal mind; that it was in fact an illusion, which he could prove to be so through his clear reasoning and resolve. Among the fearsome experiences to which he was subjected were those with cobra, savage animals, earthquake, falling into a chasm, storm at sea, hunger and thirst. He met and mastered each difficulty. One trial is worthy of of recounting by reason of its object lesson. As he followed the magician, there appeared suddenly between them a wall of rock across the path, as solid as the cave itself. Recovering from his surprise, he approached the wall, laid his hands upon it, then slapped, kicked, pounded it, and struck it with a rock. It was as unyielding as the walls of the cave. He then withdrew and reasoned with himself thus: "If there is no wall there, it is a mistake to kick, pound, or strike it, for that but adds to its seeming reality; I should treat it as nonexistent, and walk through it." He closed his eyes, stepped forward, and passed through the wall. On looking back he saw nothing except the path along which he had passed. There was no wall there.

How many of us today are striking and pounding vainly at the walls which human beliefs have raised—walls of fear, worry, grief, despair, discouragement, lack, limitation, disease, sin, and death. If we make a reality of the condition, feel it, deplore it, rail or strike at it, think or talk about it, it will appear to be as real and solid as the Rock of Gibraltar. However, if we lift our thought above and beyond the difficulty, fasten our gaze on divine Mind and its realities, take firm hold of God's hand, we shall walk through the illusion of a wall of error. Evil cannot raise a wall. It merely seems to cast a shadow. There is an old proverb, "The shadow of a dog cannot bite; the shadow of a sword cannot pierce; the shadow of death cannot kill." The twenty-third Psalm bids us "walk through the valley of the shadow." Refuse to be mesmerized by what does not really exist. God is the only reality; therefore evil has no real existence, no power to harm you.

What if there appears to be a wall of fear! Although it be mountain high, yet it will be brought low; it will utterly disappear. Know the perfect Love that casteth out fear, as the Bible teaches; and know that fear cannot enter the consciousness filled with love alone. Be conscious of that Love which embraces humanity, enfolding it in the realization of Love's ever-presence and all-power.

If one believes himself to be facing a wall of lack, with business gone, the future dark, he should know that the wall is mental. Poverty is nothing more than a self-depreciated estimate of oneself. It has been said, "Poverty is thinking poor." That wall of lack will vanish through a correct self-appraisement. Thus you will ascend to a right evaluation of yourself as an affluent son of your heavenly Father. This rightful estimate of your true value, based on your relationship to God, will be accepted and honored by others and become the basis of restoration and recovery from the belief of lack and limitation. God's man is already well supplied in that which makes for happiness, contentment, and success.

Love Is Needed

The most urgent need in the world today is for a demonstrable understanding of Love. Love is the cement of the home and society, the bond of union in the world. Hatred, warfare, murder, death are its antithesis; harmony, activity, life are its essence. Love is the one thing with which we can do all things, the one thing we cannot do without.

The law of Love is the basis of true substance, the foundation of real structure. The earth revolves in space, with each particle of sand and soil in strict adherence to cosmic law. The mighty bridge bolted and riveted swings securely on its myriad wires twisted into giant cables. The bricks and stones in the towering building reaching skyward are held together by the particles of unassuming mortar. These wonders of human achievement symbolize the adhesion of spiritual elements, the strong supporting strands of Truth, the cement and attraction of divine Love.

Love is the vital part of Christian Science, its life-giving, life-sustaining element. Heart difficulties, somewhat prevalent, indicate the need for more attention to a pure affection, less to organism. One must turn away from self, be absent from fear and be present with the great heart of divine Love. This needs no medicine except that of fear- dispelling love for God and man. This is the true remedy.

Where revengeful, selfish, ugly traits are in evidence in others, it may seem difficult to obey the Scriptural command to "love thy neighbor." But to love one's neighbor means to love not the unlovely characteristics, but the Christ-idea, the man whom God, not error, created. Thatis the only man there really is.

One student learned the meaning of this command to love one's neighbor in this wise. He enjoyed looking through his office window, on occasion, to the park below to see the beautiful trees, the colorful beds of flowers, the vivid green lawn. One bright morning, following a day of dust storm from the desert, his gaze became arrested by the dirt upon the windowpane. On looking intently he also saw some defects in the glass of which, heretofore, he had been unaware. The unsightliness held his gaze for the moment until he realized that he might look through the defects to the attractive scene beyond. This he did and again appeared to him, undimmed, the beauty of scene, of trees and garden. In a similar way this one saw how he might look through the unlovely traits of character in his neighbor and see in Science the beauty of the real man. The evil in human character may arrest one's gaze for the moment. It may silence human affection. But it need not be for long. One may, if he will, look through the mortal sense of man with its unseemly traits, and see, resplendent, man's real spiritual selfhood, beloved as the child of God. This is loving thy neighbor as thyself.

Someone said to me years ago, "I like people." This person cultivated friends as a means of service, not a self-serving means. The greater the demand, the greater the service. To her, another's faults never outweighed the good. Her loving rebuke but stirred one to greater effort. To have a friend one must be a friend. Flowers grow better where the soil is stirred; and nothing so effectively stirs the soil where friendship grows as does frequent cultivation with deeds of kindness, constant tending it with thoughts of love. He who serves man lovingly, serves God best.

Discouragement

One of the commonest phases of wrong thinking is discouragement, presenting itself as depression, despond, heaviness, grief. It is usually draped in innocence and may be passed by as a harmless indulgence. But beneath its disarming exterior lurks the thief of confidence, and the debilitating tendencies to disease, poverty, and vice. When one places himself on the toboggan of discouragement, there are other downward tendencies equally injuricus. They invoke the loss of faith in oneself, in one's ability and desire to do things, and above all a distrust in God's ability to help him. Then the bottom of despair is reached with its darkness, helplessness, and gloom. Would that the victim of discouragement might know the remedy for this state of mesmerism —a remedy so easy of access, so simple to apply. It is the same remedy, that of gratitude, which Joshua used at Jericho centuries ago when he caused the host to compass the walls with shouts of thanksgiving and with paeans of praise. Then the walls fell flat.

It is related that a peddler once was carrying a heavy pack of discouragement on his back, along a hot and dusty country road. He was burdened with its weight, depressed with his prospects, disheartened with his lot. He had carried it many miles. In his pack there were some bundles of disappointment, some tiny envelopes of deceit, a few boxes of failure, a package of grief, several lots of self-pity, large bundles of self-depreciation, an assortment of sickness, old age, and weariness; and hidden deep down at the bottom of the pack were some wee parcels of sin. At the sound of hoof beats on the roadway he hardly turned his head. A wagon stopped beside him and a cheery-voiced farmer sang out, "Better get in and ride!" With no word of reply the peddler laboriously lurched himself into the seat beside the farmer, who started his team down the road whistling a merry tune. The farmer finally turned to the abject figure at his side, hunched over with the weight of his pack still on his back. "Why don't you put your pack down in the wagon and rest yourself?" he asked. The peddler sighed and replied, "It's easier jus' tu carry it, than tu put it down." And he probably still is carrying it, for he is more accustomed to discouragement than to gratitude. It is gratitude which lays down the load of care, makes all burdens light, and "bears a song away."

Gratitude

Gratitude is more than a mere "thank you." The word comes from the same root as the word "grace." Gratitude is not only for things received but for grace bestowed. We are grateful in order to obtain more grace, more spiritual blessings, not more things. To be ungrateful is to be unmindful of God's goodness.

An effective plan to overcome discouragement is the good old-fashioned way of counting one's blessings. It is an important factor in healing the sick. If we are not grateful for the material blessings we see, how can we be grateful for the spiritual blessings we do not see? John asked, "For he that loveth not his brother whom he hath seen, how can he love God whom he hath not seen?" While God does not need our gratitude, still we do need to give it. The longer one is a student of Christian Science the more important this lesson of gratitude becomes; because it is a thing easily forgotten, and disastrous to forget.

One individual found himself in need of physical healing. In his confused state of thought he could comprehend only the simplest things. He began by thanking God for the cool sheets on the bed, the glass of water near at hand, the gracious light of day through the window, the tender, loving care of his family. This effort opened his mental door to the recognition of the healing Christ-power, and he was healed. But it did not stop there. He learned to thank God for the countless blessings around him as he went about his daily tasks. None were too trivial to escape notice. The tender blade of grass pushing its persevering way up through the hard soil became a symbol of power and life from God; each flower turning its face from dimness to light an object lesson of the joy in living and giving; sustenance, shelter, and raiment typified the heavenly Father's loving care. To think good is to thank God.

Safety for Those Under Arms

What has Christian Science to offer to those on the field of battle and to their loved ones at home? Because of the ever-availability of divine power, those at the front, as well as those behind, are equipped with the means of protection against which no devices of evil may prevail. We read in the Christian Science textbook (p. 559), "The 'still, small voice' of scientific thought reaches over continent and ocean to the globe's remotest bound." The power of Truth is instantly present and operative everywhere, every moment. Your word of Truth, uttered and understood, reaches beyond human limits and brings peace, security, and safety wherever the need may be. Thus, daily and hourly one may render effective support to those in need, whether they be on land, in the air, or on or under the sea.

The following is illustrative of the manner in which Christian Science is being used by young men and women in the armed forces all over the world. During February of 1942, when the submarine menace along the sea lanes to South America was at its height, a merchant ship loaded with dynamite and other tonnage was making its perilous way southward. The night was dark and foggy, the ship running without lights. Suddenly another vessel northbound and off its course, looming straight ahead in the darkness, collided with it. The second ship sank immediately, most of her crew being rescued. The front end of the first vessel was completely removed, leaving only the single bulkhead to keep out the water. The extensive exposure of the inner ship to the power of the waves made the captain doubtful of the bulkhead's withstanding the surging sea; for such damage had sunk other vessels. The third engineer aboard ship was a young officer who was a sincere student of Christian Science. At first he had encountered ridicule because of his faith, but several visible demonstrations had gained the general respect of many on board. As the ship lurched under the effect of the impact of the collision, this young officer hurriedly inquired of the captain, "What can I do?" "You go below to your stateroom and pray as you are taught," ordered the captain. The lad obeyed; and there in his tiny stateroom directly adjacent to the straining and bulging bulkhead, he opened the Christian Science textbook to the synonyms of God. Instantly he built his own spiritual sense of bulkhead with the foundation of it as Principle; its intelligence, divine Mind; its individuality, identity, oneness, as Soul; its substance, Spirit; its existence, Life; its everlastingness, Truth. This spiritual bulkhead was bolted and riveted in the cement of divine Love. He held tenaciously to the truths he knew; the bulkhead held; and the vessel returned safely to port. The entire personnel then recognized that he was armed with a power of which they knew nothing. Their respect and gratitude were evident. After each subsequent voyage the captain ordered the young officer to go home, once with only two hours available, that he might receive again from his mother that replenishment of spiritual inspiration which was to make the voyage a safe one for the ship and her crew.

God is ever present, hence evil is not present and is not power. God's child cloaked in the mantle of divine Love is immune to hatred and violence. His inseparability from God means his inseparability from you, for individual identities are co-existent in divine Mind. Within the confines of infinite good, man is safe, harmonious, and eternal.

Conclusion

In conclusion: The purpose of Christian Science is to show mankind how to avail itself of divine power and how to utilize it in times of extremity and urgent need. It fulfills the command of Jesus to heal the sick and the sinning. It discloses the illusionary and mesmeric nature of disease and lack. It shows the life-giving, fear-dispelling power of Truth and Love. Again on earth the Christ-power is with men, comforting the sorrowing, healing the sick, reforming the sinner, and bringing peace and quiet to a troubled world.

In the words of the poet, John Greenleaf Whittier:

"Breathe through the pulses of desire
Thy coolness and Thy balm;
Let sense be dumb, let flesh retire;
Speak through the earthquake, wind and fire,
O still small voice of calm.

"Drop Thy still dews of quietness,
Till all our strivings cease;
Take from us now the strain and stress,
And let our ordered lives confess
The beauty of Thy peace."

(Christian Science Hymnal, No. 49.)

HOW DOES CHRISTIAN SCIENCE HEAL?

The disappearance of organic and functional disease, as well as of trouble in other forms, is continually recorded among those who have turned to Christian Science for help.

The method of such overcoming of difficulty is prayer—a spiritually scientific manner of thinking based on the teaching of Christ Jesus.

What this prayer is and how anyone can understand it and use it effectually in accordance with his need are fully explained in the Christian Science textbook,

SCIENCE and HEALTH

with Key to the Scriptures

by Mary Baker Eddy

This remarkable book, other works by Mrs. Eddy, and all other authorized Christian Science literature may be read, borrowed, or purchased at the Christian Science Reading Room,

Elwood and Brewster

Open to the public at the following hours: 11:30 to 4:30 and Thursdays, 7:30 to 9:30, Church of Christ, Scientist.
